EDUCATION

University of North Carolina at Charlotte (UNCC)

Bachelor of Science in Data Science, Minor in AI Systems

Expected Graduation: December 2028

Relevant Coursework:

- DTSC 1301: Data Science Principles
- DTSC 2301: Data Modeling and Society
- Foundations of Artificial Intelligence & Machine Learning
- Applied Data Structures & Python Programming
- Statistical Analysis & Data Modeling

TECHNICAL SKILLS

- **Languages & Libraries:** Python, Pandas, Matplotlib, Seaborn, SQL
- **Developer Tools:** Git, GitHub, Jupyter Notebooks, VS Code
- **Core Competencies:** Exploratory Data Analysis (EDA), API Integration, Web Scraping, Data Ethics

DATA SCIENCE PROJECTS

Exploratory Data Analysis Project | DTSC 2301 | 2026

- Programmed Python scripts to fetch datasets via API/web scraping following ethical access guidelines.
- Utilized Pandas to clean, transform, and structure raw data for analysis.
- Built data visualizations with Matplotlib/Seaborn to identify key trends and domain insights.

EXPERIENCE & ATHLETICS

NCAA Division I Student-Athlete (Golf) | NCCU (North Carolina Central University)

- Maintained rigorous training, travel, and tournament schedules while balancing full-time coursework.
- Developed high-level discipline, time management, and resilience under competitive pressure.
